

tamaki niime's  
strong preference for fabric

tamaki niime weaves the fabric from scratch

by ourselves.

There aren't many for a brand

to weave its own fabric.

We produce our fabric

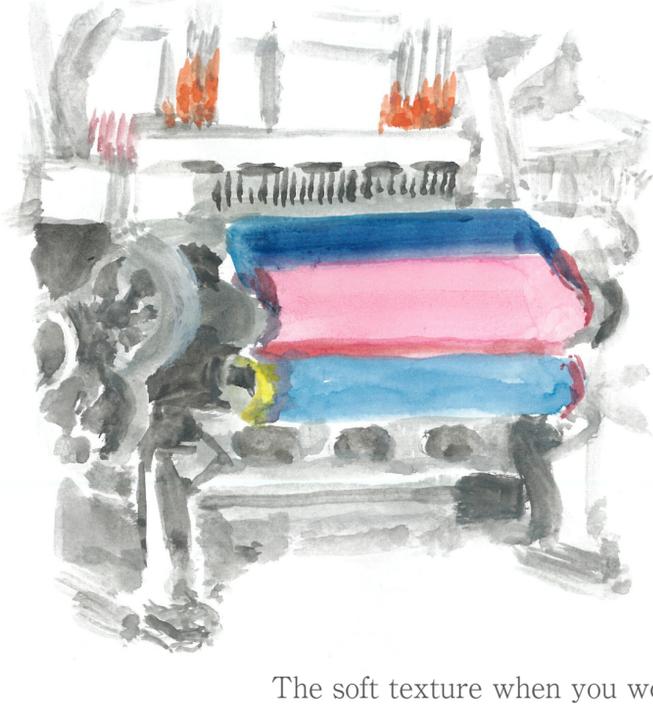

which is out of common sense and

different from others

in an environment we can thoroughly stick to

and emphasis on comfort.

## 1 The ultimate softness

The soft texture when you worn is

very important to tamaki niime.

Slowly and slowly move the vintage loom

to weave into a gentle and soft fabric.

## 2 The comfort no other can do

Wash it ourselves and dry it

in nature by exposing to the sun and wind

one by one to create a fluffy texture.

By making it fluffy, it feels good to the skin

and is finished in a light work.

## 3 We aim for further comfort

How we weave softly

How soft it can be

Sometimes with machine improvements

We are always exploring.

tamaki niime's creation which is particular

about infinitely soft comfort is evolving day by day.
